Large research libraries dominate

From *Jaws*.Full citation in alt-text.

TDL tries to mitigate *some* of the problems caused by a **increased technological needs** and **steadily diminishing resources**

“We need to do a full TRAC audit before we start”

“Our digital preservation strategy is non-existent”

“We’re still stuck in the 90s technologically”

“We only have 3 FTE staff”

“IT doesn’t think we need anything else”

“We can’t afford to preserve everything right now, so what can we do?”

WE ARE . . . UNITED IN OUR COMMITMENT TO PRESERVE the cultural, intellectual, scientific and academic record for current and future generations . . .

The mission of our shared work is rooted in a set of core values.

Digital Preservation Declaration of Shared Values

DURA SPACE

thinking globally

Regaining balance

TDL's got work to do

the importance of inclusion

Including **people of different types** in a community is better for the **workplace,** the **profession** and the **services provided**

the problem of branded silos

Erases the labor of the collective by failing to credit systems and communities in favor of **institutional self-promotion**

the problem of passivity

Contribute back.
